Business Valuation

Our team of professionals allocates adequate time to understand the specifics of your business and assess all the factors unique to both the company and the current valuation, which may affect the outcome. It is critical to understand how your business creates value, its strategic positioning, and the transaction landscape around you. As experts in our field, we comprehend these matters and translate them into value-added opinions for your worth.

Property Valuation

We conduct all kinds of Real Estate Valuations handled by a qualified team of experts following international standards and accepted market practices. Our team is licensed by Dubai Land Department, Abu Dhabi Municipality and has certified qualifications from the Royal Institute Of Chartered Surveyors. The UK follows the local guidelines and international standards to conduct the valuations. Our team can handle all kinds of real estate assets ranging from small apartments to huge portfolios.

Assets Valuation

At the heart of every company's mission is the pursuit of wealth creation. To accurately measure income, businesses must carefully track their expenditures, particularly those related to high-value assets. Fixed assets, such as manufacturing facilities and heavy machinery, comprise a significant portion of a company's expenses. It is crucial to regularly evaluate the price and value of these assets through plant and equipment valuation

Property Snagging and Inspection

Credence & Co. offers full range services of Property Snagging and Inspection in UAE. As an approved property snagging and inspection by the local authorities, We offer services to identify defects or issues in a property, particularly in newly constructed or renovated homes and buildings. These services help ensure the property meets quality standards and building codes before the owner takes possession. Key services include:

Snagging Inspection

Identifying any minor or major issues in the property, such as poor finishes, improper installations, or construction defects (e.g., cracks, paintwork problems, or faulty electrical and plumbing work).

Structural Inspection

Evaluating the overall structural integrity of the building, ensuring foundations, walls, roofs, and floors are sound and meet safety requirements.

Mechanical, Electrical, and Plumbing Inspection

Ensuring systems such as air conditioning, heating, ventilation, electrical wiring, and plumbing are properly installed and functional.

Property Snagging and Inspection

In addition to snagging inspections, we offer detailed assessments that include evaluating mechanical, electrical, and plumbing systems, as well as structural integrity checks. Our team is committed to delivering thorough reports that highlight any concerns, enabling property owners to address issues proactively and ensure a smooth transition into their new homes.:

Thermal Imaging

Checking for potential insulation problems, leaks, or energy inefficiencies that might not be visible to the naked eye.

Moisture Testing

Detecting dampness, water leaks, or mold issues that could lead to more severe damage in the future.

Post-Construction Follow-up and Handover Inspection

Conduct follow-up inspections to confirm that the builder has fixed any identified snags or issues.

Assisting the buyer during the handover process to make sure the property is delivered in the agreed condition and all contractual obligations are met
